EDUCATION

Pandit Deendayal Energy University

B.tech in Computer Engineepring - **3.42 - 4.00**

July 2023 – July 2026

Gandhinagar, Gujarat

PROFESSIONAL EXPERIENCE

Space Applications Centre [ISRO] 

Software Engineering Intern

May 2026 – July 2026

Ahmedabad, Gujarat

- **Succesfully** parsed **50+** pulsar timing vectors from the **12.5-year** NANOGrav dataset using PAR/TIM format.
- **Integrated** a secure **Trusted Learning Environment (TLE)** using **Ollama**-hosted large language models, using **1T-parameter-class GLM and Qwen models**, to enable local AI-assisted analysis of mission simulations.
- **Achieved 6.8 km** error at the **95th percentile** across **1,000+ Monte Carlo trials** on Voyager 1 trajectory.
- **Improved** photon arrival-time estimation under low-SNR conditions by implementing **NHPP simulation**, epoch folding, and cross-correlation phase-delay estimators.

PROJECTS

Monerva  | [Node.js](#), [Express.js](#), [PostgreSQL](#), [EJS](#), [JavaScript](#)

April 2025

- **Developed** a Fin-Tech platform with **multi-feature expense management**, **AI integration** and financial insights
- **Secured 100+ real-time users** with JWT-auth, session management, RBAC, and workspace-level data isolation.
- **Built 20+ RESTful APIs** for transactions, wallets, budgets, transfers, settlements, and AI-powered receipt scanning.
- **Implemented Splitwise-style** expense sharing with friend/group balances, partial settlements, and debt simplification.
- **Integrated** AI receipt scanning with structured expense extraction, duplicate detection, category mapping, and review-before-save validation.
- **Engineered** AI-powered financial insights using **LangChain**, LLMs, and contextual transaction data for intelligent spending analysis and personalized recommendations.

Kronos  | [Go](#), [gRPC](#), [Redis](#), [Docker](#), [Prometheus](#)

July 2026

- **Optimized** a financial foundation model spanning by training on **K-line** data from **45+ global exchanges**.
- **Validated** market forecasts through **30-step regression tests** and quantitative backtesting across financial time series.
- **Automated** trading workflows through an external Ai with API-key orchestration, reducing external service costs to **\$0**.
- **Achieved 15% profit** in paper trading through autonomous AI-driven trading strategies and quantitative backtesting.

Jobkart.ai  | [Python](#), [FastAPI](#), [React.js](#), [MongoDB](#), [Scrapy](#)

August 2026

- **Streamlined** job discovery (**10,000+**) by developing an automated dashboard incorporating workflow management.
- **Reduced** job dispatch latency by **40%** by optimizing Redis queue pipelines and gRPC across scheduling components.
- **Boosted** crawler throughput by **50%** by implementing asynchronous execution and fault-tolerant scraping workflows.

Technical Skills

- **Languages:** Python, Java, C, C++, Go, JavaScript, SQL, R, Dart
- **Full Stack:** React.js, Next.js, Node.js, Express.js, FastAPI, Flask, EJS, HTML, CSS, REST APIs, gRPC, Flutter
- **GenAI:** LLMs, RAG, NLP, Transformers, Ollama
- **Agentic AI:** AI Agents, Multi-Agent Systems, Tool Calling, API Orchestration, Autonomous Workflows
- **AI/ML:** Scikit-learn, NumPy, Pandas, Machine Learning, Deep Learning
- **Databases:** PostgreSQL, MongoDB, Redis, SQLite, Supabase
- **Tools:** Git, GitHub, Docker, Prometheus, Vercel, Jupyter Notebook, VS Code, IntelliJ IDEA, Obsidian

Certifications & Achievements

- **McKinsey Forward Fellow:** Selected for McKinsey's global leadership and professional development program.
- **Reported** a reproducible **Claude Code** bug causing installed plugin skills to fail despite successful MCP connectivity.
- **OmniRoute:** Helped optimize intelligent AI request routing with database health monitoring and diagnostics.
- **Agentic AI Certifications:** Earned **15+** verified credentials in agentic AI, Gen-Ai, and developers tooling.
- **Civic & Social Service Internship (CSSI):** Completed community service with planting **200+** plants, trees.
